**The councillor of Urban Scene claims the Regional Government to act in Vasco Nuñez de Balboa school**

**Benidorm City Council will start next Monday, September 12, works to remove the cover of the municipal warehouse, considering the report of Risk Prevention indicating that there is presence of asbestos and cement in it. The councillor for Urban Scene and Human Resources, José Ramón González de Zárate and Jesús Carrobles, explained that this action has a cost of around 47,000 euros and also includes the replacement of the roof of a small store of the sports city Guillermo Amor. The works will be carried out by a specialist and will last approximately 10 days. Zárate indicated that during the works, "the municipal warehouse moves to the bullring to keep all**

**services". The councillor explained that this action has been delayed until September waiting for approval by the Ministry. Zárte indicated that removal of the cover is a vindication "for years" made by Technical Services and Technical of Occupational Health and Safety, concretely in 2011, "when the technician said it had to be changed" following the letter sent by an official. The councillor clarified that the current government took steps to replace the cover when knowing the matter, "as we knew nothing about it and when we were in the opposition or when we began to govern. In this regard, he recalled that has also been detected in fiber cement in the roof of the public school gym Vasco Nuñez de Balboa, a facility that depends on the Ministry of Education in which the City Council wanted to act. In fact, budgets for this performance were also requested. Therefore, De Zárte and Carrobles have asked the government of the Generalitat that "immediately do the work and change the roof of the gym," while urged the Socialist Party spokesman, Rubén Martínez, to join this request " since in the years he was councilman of Education did nothing ".**
