The City Council opens an access to the green area from Xixo avenue

The City Council opens an access to the green area from Xixo avenue

Parking has been arranged for the vial is always free to facilitate passage to emergency vehicles

Benidorm City Council has proceeded to arrange parking in the upper area of Xixo Avenue, in Poniente, so that there is permanent access from this path to the green area surrounding the valley of the same name. The councilman for Urban Scene, José Ramón González de Zárate, detailed that an access has been opened that connects the avenue with the vial of land that leads into this wooded area, to "allow and facilitate the passage of emergency vehicles." Zárate noted that so far the vehicles parked around in this zone could prevent access to the green zone. With the organization that has been practiced, access will be free of vehicles, which may continue stationing on the left and right sides of this step.
