## Benidorm launches a special brigade for cleaning and disinfection in strategic places

Benidorm launches a special brigade for cleaning and disinfection in strategic places. Supermarkets, pharmacies, medical and health centers receive a special boost these days

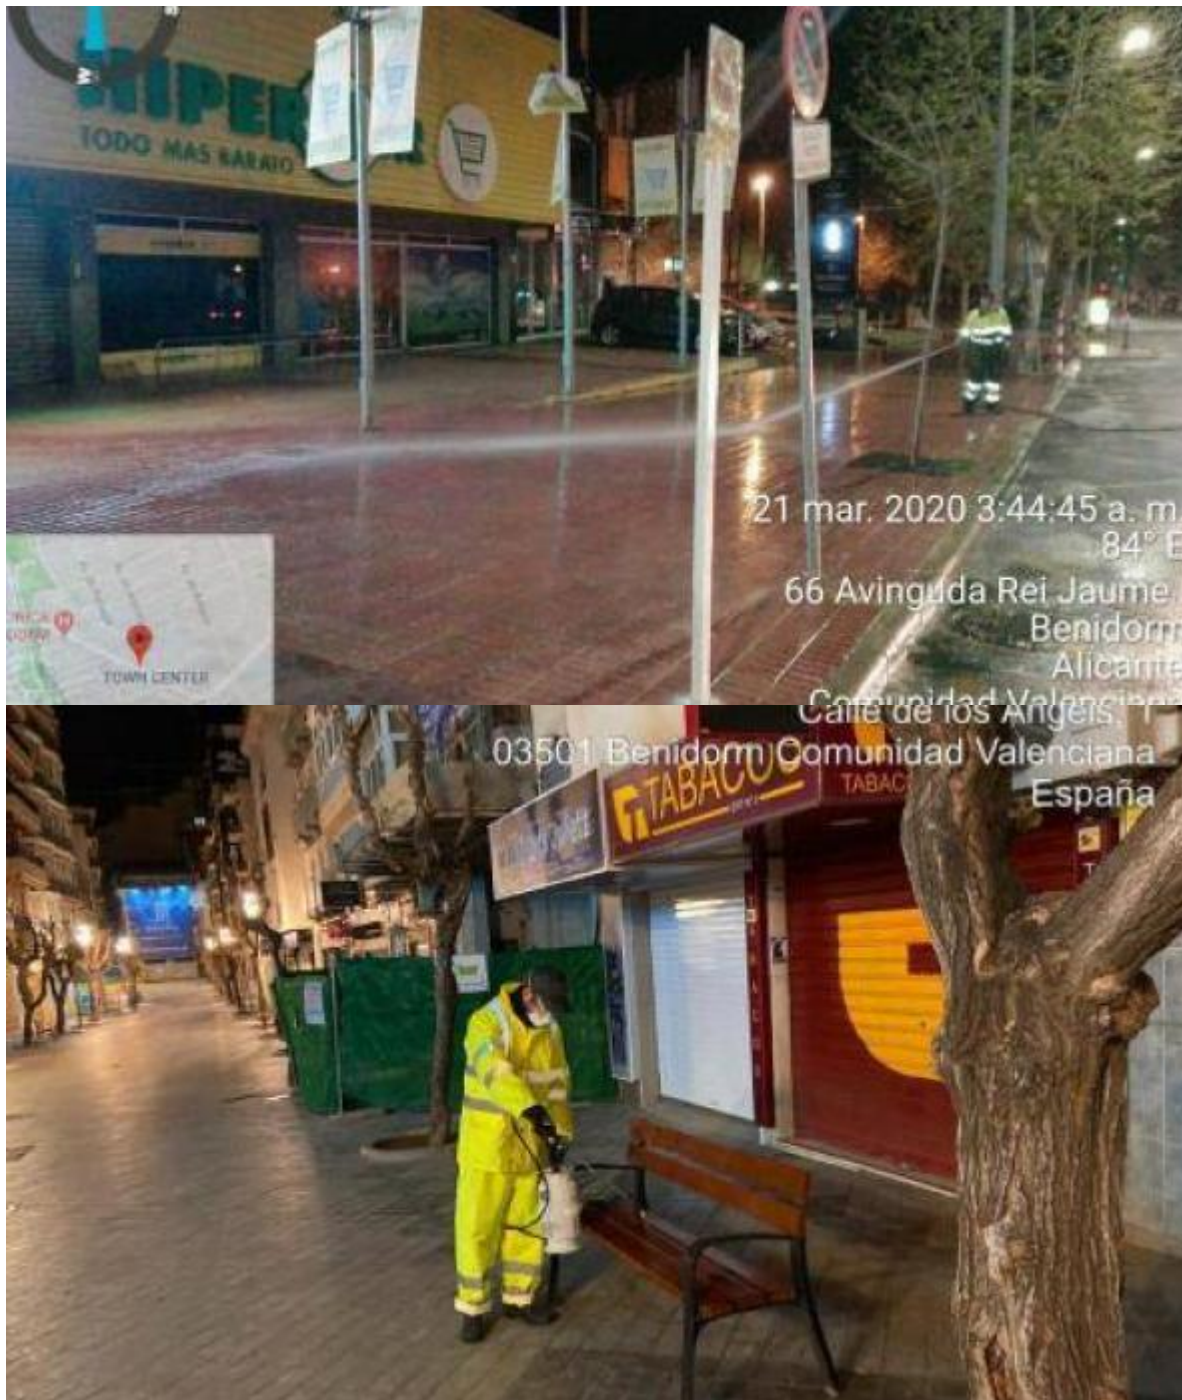

Benidorm doubles its efforts in cleaning and disinfection to establish a safer environment for its citizens in the campaign against Covid-19. As they are places with the greatest affluence and pedestrian traffic, the municipal brigades increase their activity and deepen their cleaning and disinfection for accesses and surroundings to supermarkets, health and medical centers, tobacconists and other operating services under the regulations applied in the alarm state.

At the moment, Benidorm is in close collaboration with members of the Military Emergency Unit in these tasks.

The Councilor for Street Cleaning, José Ramón González de Zárate, has highlighted the degree of involvement of the brigade in these spaces in favor of disinfecting the busiest places these days.
